

HDF Science Data Set (SDS) Information Tool

A computer and operating system independent utility is provided for generating an ASCII file of SDS information contained within an HDF file. It is a pre-compiled software package that uses the [IDL Virtual Machine](#), which comes bundled with IDL and is available from Exelis Visual Information Solutions. The package was tested on UNIX (Sun Solaris and SGI Irix) and PC Windows systems with IDL version 6.2.

- [Readme File](#) - text file (6.5kb)
- [SDS Information Tool](#) - IDL VM executable file (29.8kb)
