

# LMOL report for 2021 September 1 operations ; University of Houston Campus

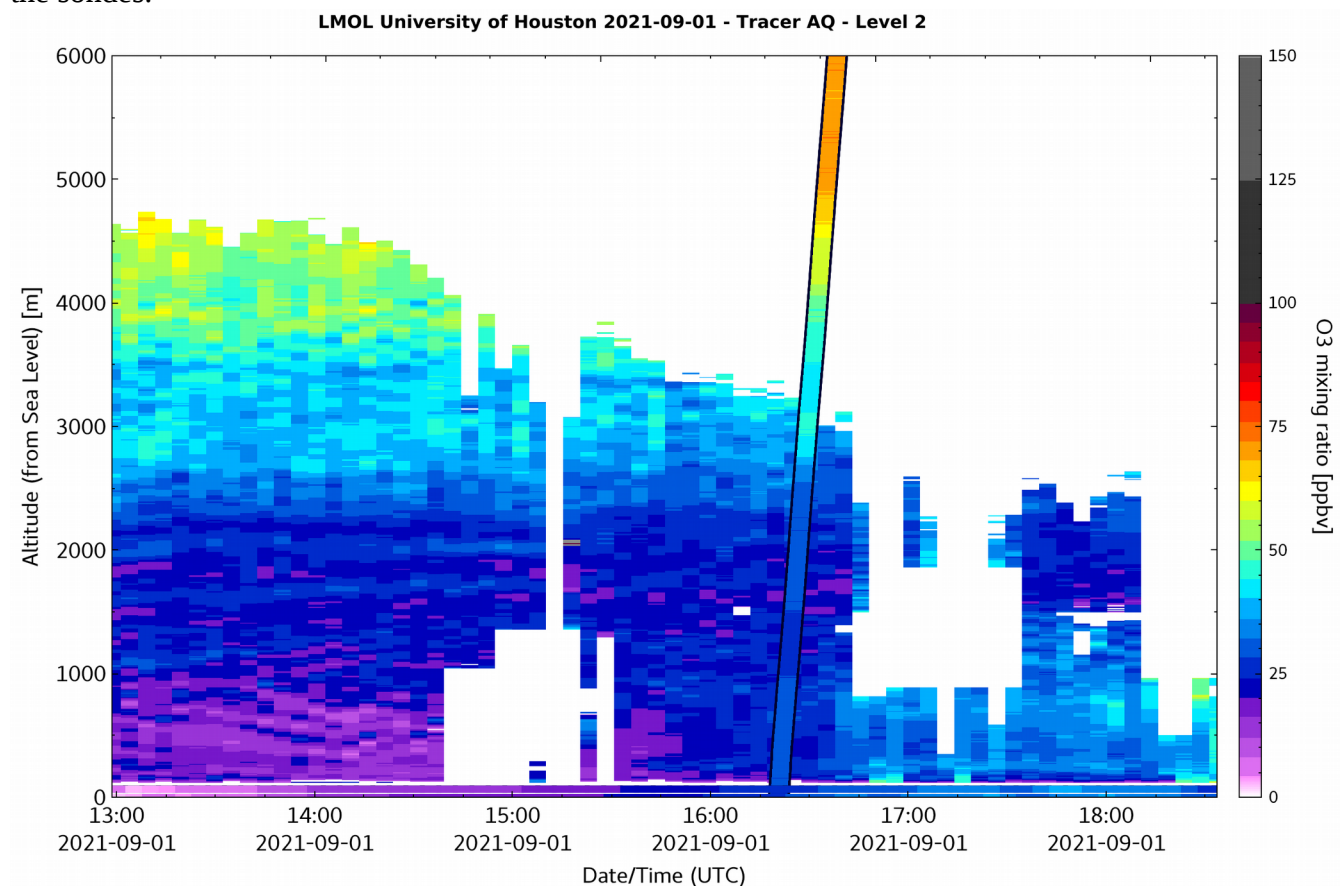

Contact: [Guillaume.P.Gronoff@nasa.gov](mailto:Guillaume.P.Gronoff@nasa.gov) ; Timothy.A.Berkoff@nasa.gov

Sonde operations: none

## Lidar operations

The lidar was started around 8h00 LT / 13h00 UTC; it performed nominally until the afternoon when clouds became abundant. A near full coverage has been done in that time period, with perturbations coming from clouds.

The level2 quick look is below, along from the ground data from Moody Tower, the Launch Trailer, and the sondes.

This is a preliminary data plot that went through the first quality review.
